Štěpán Jabůrek

Prague stepan.jaburek@fsv.cuni.cz stepanjaburek

Education

PhD in International Relations - in progress Sep 2025 – ?
Institute of Political Studies, Charles University
- Dissertation topic: Elite Communication about Global Economic Governance
- Focus: International Cooperation, Political Methodology, Political Behavior
- Supervisor: Michal Parízek

Master's in International Relations Sep 2023 – Sep 2025
Institute of Political Studies, Charles University
- Summa cum laude

Erasmus Exchange in Political Science Jan 2025 – Jun 2025
Department of Political Science, University of Copenhagen
- **Coursework:** Advanced Statistics and Machine Learning

Bachelor's in Political Science Sep 2020 – Jun 2023
Institute of Political Studies, Charles University

Research Experience

Doctoral Researcher, Charles University Sep 2025 – today

Research Assistant, Charles University Nov 2024 – Today
- Research assistance to Jakub Tesař and Michal Šoltés

Research Executive, Ipsos Feb 2024 – Sep 2025
- Public opinion polling and market research

Teaching Experience

Researching International Politics: Quantitative Methods, Charles University WS 2025, 2026
- MA Level, Co-Lecturer (10%)

Political Text Analysis and Applied Machine Learning, Charles University WS 2025
- MA Level, Co-Lecturer (10%)

Global Political Economy, Charles University WS 2025, 2026
- MA Level, Co-Lecturer (10%)

Quantitative Methods of Political Research, Charles University SS 2026
- BA Level, Co-Lecturer (40%)

Publications

1. **Jabůrek, Štěpán** (2024). "Czech Parliamentary Speeches Dataset 2016-2023; full transcripts of plenary speeches from the Chamber of Deputies", Harvard Dataverse, https://doi.org/10.7910/DVN/FOQUZF. *(Dataset)*

2. **Jabůrek, Štěpán**, Adam Černý, Christian Rauh and Jan Schwalbach (2026) 'Machine Translated ParlSpeech V2: Full-text corpora of 3.5 million parliamentary speeches from seven European countries translated into English', Harvard Dataverse, https://doi.org/10.7910/DVN/FNJCSB. *(Dataset)*

7. **Jabůrek, Štěpán**. "The Bayesian Divide in Political Science". *(Working research article)*

Conference Presentations

ECPR General Conference 2026
- Jagiellonian University

COMPTEXT Annual Conference on Computational Text Analysis 2025, 2026
- University of Vienna, University of Birmingham

Methods Workshop on Large Language Models and Generative AI in Political Science 2025, 2026
- Charles University, Comenius University Bratislava

PhD Student Conference at Charles University 2024, 2025
- Charles University

Current Grant Projects

1. Co-Investigator, **Odchod od sociální demokracie? (In)Kongruence jako faktor vysvětlující volební chování levicovětradicionalistických voličů ve střední a východní Evropě (GAUK)**. PI is Mgr. Jan Vondráček (Charles University). 2026 – 2028

2. Researcher, **The influence of the USA and Russia on the quality of democracy in post-communist Europe and Latin America (PRIMUS)**. PI is Jaroslav Bílek (Charles University). 2026 – 2027

Past Grant Projects

3. Researcher, **ENSURED (Horizon Europe)** – PI is prof. Hylke Dijkstra (Maastricht University), Leader of my WP is doc. Michal Parízek (Charles University). 2025 – 2026

4. Research Assistant, **Sentencing Disparities: Causes, Consequences, and Remedies (GAČR)**. PI is Michal Šoltés (Charles University). 2025 – 2026

5. Research Assistant, **Mutual interaction of the self-perspective and the other-perspective in political decision-making: a perspective of** 2024 – 2025

quantum social science (GAČR). PI is Jakub Tesař (Charles University).

Consultancy and Community Contribution

Quantitative & Research Training for POLITICO Research & Analysis Division 2026

- Co-taught a 10-day intensive course of quantitative research for a team of Politico.eu data journalists.

R Package *bayeswatch* 2026

- A package wrapping MCMC visualizations on Bayesian models in *brms* and *rethinking*

  https://github.com/stepanjaburek/bayeswatch

Citation Leaderboard of the Faculty of Social Sciences, Charles University 2026

- Web app tracking citation counts of FSV UK faculty on Google Scholar and Web of Science

  https://stepanjaburek.shinyapps.io/fsv-leaderboard/

Methods Schools

Spring School of Bayesian Statistical Modeling, Charles University 2026

- 5-day, 40-hour intense course on Bayesian Statistics offered by the Biology Departments at Charles University and taught by Petr Tureček and Jan Smyčka

Summer School on Bayesian Statistics for Natural Scientists, Charles University 2026

- 5-day, 40-hour intense course on Advanced Bayesian Statistics offered by the Biology Departments at Charles University and taught by Denis Valle (University of Florida)

Languages

English (C2), German (B1), Spanish (passive)

Academic skills

Substantive Expertise:

- International Cooperation, International Organizations, Political Behavior

Research Methods:

- Natural Language Processing (NLP) and Text-As-Data, Statistical Modeling, Bayesian Statistics

Programming Languages:

- R, Python, LaTeX
